

Please allow XM radio - satellite radio to offer traffic and weather for my area and other areas I travel. I live in an area where it's harder to get regular traffic reports because most metro-Atlanta radio stations don't reach out to my home until I'm almost to work. So from the time I leave home to the time I hit the interstate in Alpharetta, I can't get traffic updates - I count on XM being able to bring that to me very soon. Please don't keep them from trying to offer something radio stations don't provide enough of very frequently.
